

List of EU and EFTA trading partners approved to export meat products and treated stomachs, bladders and intestines to Great Britain

Recent Changes

Country	Description of Change	Date of Update
Spain	Outbreaks of African Swine Fever in wild boar have been reported in Spain. Imports of meat products of wild swine from the regions of Spain listed in Parts II and III in the 'Regions of EU Member States restricted due to ASF outbreaks' document published here (territory codes ES-3 and ES-4), must be subject to treatment 'C'. Imports of meat products of domestic porcine from the regions of Spain listed in Part II (ES-3) must be subject to treatment 'D'. Imports of meat products of domestic porcine from the regions of Spain listed in Part III (ES-4) must be subject to treatment 'C'.	02/12/2025
Hungary	Defra has reviewed the actions taken by the Hungarian Competent Authority in response to an outbreak of foot-and-mouth disease (FMD) that was confirmed on 6 March 2025 and concluded that Hungary can be considered as free of FMD from 10/09/2025. As a result, heat treatment 'D1' has been replaced by 'A' in columns 3, 4 and 10 of Hungary's entries. Treatment requirements in column 5 have changed from 'D1' to 'A' from HU-1 (ASF free zone) and HU-2 (ASF surveillance zone), from 'D1' to 'D' from HU-3 (ASF in wild pigs), and remain as 'C' from HU-4 (ASF in domestic pigs) to mitigate the risk of African Swine Fever. Treatment requirements in column 11 have changed from 'D1' to 'A' from HU-1, and remain as 'C' from HU-2, HU-3 and HU-4 (ASF restricted zone), to mitigate the risk from African Swine Fever. In addition, footnote 'c' has been added to Hungary's entries, which stipulates that 'for certification purposes, this territory is considered to have been free of FMD from 10/09/2025'.	17/09/2025
Austria	Defra has reviewed the actions taken by the Austrian Competent Authority in response to an outbreak of foot-and-mouth disease that was reported on the Hungary-Austria border on 26 March 2025. As a result, heat treatment 'A' has been inserted in columns 3, 4, 5, 10 and 11 of Austria's entries.	24/06/2025
Bulgaria	Defra has reviewed the actions taken by the Bulgarian Competent Authority in response to outbreaks of Classical Swine Fever (CSF) and concluded that the entire territory of Bulgaria can be recognised as free of CSF from 24/04/2025. Treatment requirements for domestic porcine and farmed cloven-hoofed game (swine) (column 5) have changed from 'C' to 'A' in BG-1 and BG-2, and from 'C' to 'D' in BG-3. Treatment requirements for wild swine (column 11) have changed from 'C' to 'A' in BG-1.	30/05/2025
Germany	Defra has reviewed the actions taken by the German Competent Authority in response to an outbreak of foot-and-mouth disease (FMD) that was confirmed on 10 January 2025 and concluded that the containment zone (DE-7) can be recognised as free of FMD from 14/05/2025. As a result, heat treatment 'A' has been inserted in columns 3, 4, 5, 10 and 11 of DE-7. In addition, footnote 'b' has been added to DE-7 which stipulates that 'For certification purposes, this territory is considered to have been free of FMD from 14/05/2025'.	14/05/2025
Austria	Imports of domestic bovine, domestic ovine/caprine, domestic porcine, wild cloven-hoofed game and wild swine meat products from Austria must be subject to at least treatment 'D1', following report of an outbreak of foot-and-mouth disease on the Hungary-Austria border on 26 March 2025.	27/03/2025
Slovakia	Foot-and-mouth disease was confirmed in Slovakia on 21 March 2025. The restrictions outlined in the entry dated 07/03/2025 continue to apply.	27/03/2025
Germany	Following an assessment of the measures implemented by the German authorities in response to an outbreak of foot-and-mouth disease (FMD) confirmed on 10 January 2025, the UK has recognised regionalisation for this outbreak. Treatment 'A' may be used for meat products of bovine, ovine/caprine and wild cloven-hoofed game from FMD-free areas in Germany (DE-1). Treatments 'A', 'C' or 'D' may be used for porcine and wild swine meat products from FMD-free areas, depending on whether the meat originates in an ASF-free (DE-1) or ASF Restricted Zone (DE-2, DE-3 or DE-4)	24/03/2025
Slovakia	Imports of domestic bovine, domestic ovine/caprine, domestic porcine, wild cloven-hoofed game and wild swine meat products from most regions of Slovakia must be subject to at least treatment 'D1', following confirmation of an outbreak of foot-and-mouth disease on the Hungary-Slovakia border on 6 March 2025. Imports of porcine meat products from SK-4 (ASF in domestic pigs) and wild swine meat products from SK-2, SK-3 and SK-4 (ASF restricted zone) continue to require treatment 'C', to mitigate the risk from African Swine Fever.	07/03/2025
Hungary	Imports of domestic bovine, domestic ovine/caprine, domestic porcine, wild cloven-hoofed game and wild swine meat products from most regions of Hungary must be subject to at least treatment 'D1', following confirmation of an outbreak of foot-and-mouth disease on the Hungary-Slovakia border on 6 March 2025. Imports of porcine meat products from HU-4 (ASF in domestic pigs) and wild swine meat products from HU-2, HU-3 and HU-4 (ASF restricted zone) continue to require treatment 'C', to mitigate the risk from African Swine Fever.	07/03/2025
Germany	Imports of domestic bovine, domestic ovine/caprine, domestic porcine, wild cloven-hoofed game and wild swine meat products from most regions of Germany must be subject to at least treatment 'D1', following confirmation of an outbreak of foot-and-mouth disease on 10 January 2025. Imports of porcine meat products from DE-4 (ASF in domestic pigs) and wild swine meat products from DE-2, DE-3 and DE-4 (ASF restricted zone) continue to require treatment 'C', to mitigate the risk from African Swine Fever.	13/01/2025
EU Member States	Imports of porcine meat products from those areas listed in Part II in the 'Regions of EU Member States restricted due to ASF outbreaks' document must now be subject to treatment 'D'.	30/10/2024
EU Member States	Under the Border Target Operating Model (BTOM), the UK recognises highly pathogenic avian influenza (HPAI) regionalisation of EU Member States by cross-referencing EU legislation. Imports of meat products of poultry, farmed rattes and wild game birds that originate from zones in EU Member States under restriction due to outbreaks of HPAI, from the date of confirmation of disease (closing date) until the date restrictions are lifted (opening date), must be subject to treatment 'D'. For further information on restricted zones and opening and closing dates see the poultry and poultry products document.	08/02/2024
Sweden	Outbreaks of African Swine Fever in wild boar have been reported in Sweden. Imports of meat products of wild swine from the regions of Sweden restricted by the Sweden authorities due to those outbreaks must be subject to treatment 'C'.	03/10/2023
Croatia	An outbreak African Swine Fever in domestic pigs has been reported in Croatia. Imports of meat products of domestic porcine and farmed cloven hoofed game (swine) must be subject to treatment 'C'. Restrictions also apply to meat products of wild swine from the regions of Croatia restricted by the Croatian authorities.	10/07/2023
Greece	An outbreak African Swine Fever in domestic pigs has been reported in Greece. Imports of meat products of wild swine from the regions of Greece restricted by the Greek authorities due to those outbreaks are no longer approved. Imports of meat products of domestic porcine and farmed cloven hoofed game (swine) must be subject to treatment 'C'.	17/05/2023
Greece	Outbreaks of African Swine Fever in wild boar have been reported in Greece. Imports of meat products of wild swine from the regions of Greece restricted by the Greek authorities due to those outbreaks must be subject to treatment 'C'.	09/02/2023

EU and EFTA Countries

List of trading partners approved to export meat products and treated stomachs, bladders and intestines to Great Britain

This document is published by the Secretary of State, with the consent of the Scottish Ministers and Welsh Ministers, in accordance with EUDN 2007/777

Information Keys

Interpretation of codes used in Table 2

Non-specific treatment:

- A No minimum specified temperature or other treatment is established for animal health purposes for meat products and treated stomachs, bladders and intestines. However, the meat of such meat products and treated stomachs, bladders and intestines must have undergone a treatment such that its cut surface shows that it no longer has the characteristics of fresh meat and the fresh meat used must also satisfy the animal health rules applicable to exports of fresh meat into Great Britain.

Specific treatments listed in descending order of severity:

- B Treatment in a hermetically sealed container to an Fo value of three or more
- C A minimum temperature of 80 °C which must be reached throughout the meat and/or stomachs, bladders and intestines during the processing of the meat product and treated stomachs, bladders and intestines.
- D A minimum temperature of 70 °C which must be reached throughout the meat and/or stomachs, bladders and intestines during the processing of meat products and treated stomachs, bladders and intestines, or for raw ham, a treatment consisting of natural fermentation and maturation of not less than nine months and resulting in the following characteristics:
 - Aw value of not more than 0.93.
 - pH value of not more than 6.0.
- D1 Thorough cooking of meat, previously deboned and defatted, subjected to heating so that an internal temperature of 70 °C or greater is maintained for a minimum of 30 minutes.
- E In the case of 'biltong'-type products, a treatment to achieve Aw value of not more than 0.93; pH value of not more than 6.0.
- F A heat treatment ensuring that a centre temperature of at least 65 °C is reached for a period of time as necessary to achieve a pasteurisation value (pv) equal to or above 40.
- XXX No certificate laid down and meat products and treated stomachs, bladders and intestines containing meat of this species are not authorised.

Footnotes

- a For certification purposes, this territory is considered to have been free of FMD for more than 24 months.
- b For certification purposes, this territory is considered to have been free of FMD from 14/05/2025.
- c For certification purposes, this territory is considered to have been free of FMD from 10/09/2025.
